

Christopher Golizio

New Orleans, LA • (504) 975-1196 • cmgolizio@gmail.com • linkedin.com/in/cmgolizio • https://github.com/cmgolizio

Fullstack JavaScript developer focused on React, Next.js, API integrations, and production ready user experiences. Experienced building deployed applications with Firebase, Supabase, OpenAI, Claude, and third party APIs, with a background in client-facing leadership, technical mentorship, and high pressure problem solving.

WORK EXPERIENCE

Graze & Friends, LLC Software Developer

06/2021 - 08/2024
New Orleans / Remote

- Rebuilt, maintained, and debugged the company's website using WordPress customization and JavaScript.
- Collaborated directly with the business owner to translate site needs, fixes, and content updates into working features.
- Troubleshoot layout, functionality, and front-end issues while balancing code-level edits with WordPress tools, resulting in the page's initial load time improving by 27%.

SKILLS

Languages: CSS3, HTML5, JavaScript, TypeScript

Frontend: Chakra UI, Material UI, Next.js, React, Tailwind CSS

Backend & Databases: Express.js, Firebase, Firestore, MongoDB, Mongoose, Node.js, Supabase

APIs & Tools: AWS, Axios, Claude API, Git, GitHub, Nginx, OpenAI API, Postman, REST APIs

PROJECTS

Draw & Order - Police sketch-artist simulator (Next.js, Supabase, OpenAI)

// CODEBASE: <https://github.com/cmgolizio/draw-and-order> // DEPLOYED: <https://drawandorder.vercel.app>

- Built AI-assisted suspect description, image generation, and visual similarity scoring workflows using embeddings and structured comparisons.
- Developed authenticated image upload, storage, and scoring flows with Supabase Auth, Storage, and server-side API endpoints.
- Reduced image-generation latency through request-flow improvements and fallback handling.

ReciPeace - Food + cocktail recipe discovery platform (Next.js, Firebase, Spoonacular API)

// CODEBASE: <https://github.com/cmgolizio/recipeace> // DEPLOYED: <https://recipepeaceful.vercel.app>

- Built authenticated ingredient, pantry, and favorites workflows using Firebase Auth and Firestore.
- Integrated Spoonacular and cocktail data sources with custom filtering, ranking, and recipe suggestion logic.
- Created reusable React components, custom hooks, and resilient data-fetching flows for a responsive user experience.

Wordle Too - Infinite-play Wordle clone (React, Node.js, Axios)

// CODEBASE: <https://github.com/cmgolizio/Wordle-v3> // DEPLOYED: <https://wordle-too.vercel.app>

Built a React game UI connected to a custom REST API, with Context API and localStorage-based state persistence.

EDUCATION

Advanced Software Engineering Immersive • Operation Spark

New Orleans, LA • 12/2020 - 08/2021

Earned IBC Certifications: Fundamentals of JavaScript I & II.
